

Bug Reporting:

Bug 1:

Title: The Alphabetical order used for games is vice versa

Description:

Noted that used the alphabetical order A-Z and Z-A to structure the games according to their alphabets it is incorrect. When selecting A-Z the games will be Z-A order and when you select Z-A the order will be A-Z.

To Reproduce:

- **Open:** <https://www.videoslots.com/>
- When the site launches click on **All Games**.
- Under All Games investigate the order of games.
- Try to change the order from A-Z to Z-A and monitor if this changes correctly.

Expected Results:

The order of the games to follow as selected if A-Z is selected the games to follow this order and be displayed accordingly.

Actual results:

The order selected by the player does not affect the games display accordingly.

Bug 2

Title: The maximum number of rows displayed for Slots games does not match the actual rows.

Description:

Noted that when the maximum number of rows displayed for slots it is higher than the actual maximum number of rows they're on the site.

To Reproduce:

- Open <https://www.videoslots.com/casino/>
- When the site launches select **All Games**
- Under **All Games** select **Slots**
- Under **Slots** monitor the rows and select the maximum number of rows for games available

Expected Results:

The maximum rows available in the site for games to be available when selected.

Actual Results:

The current maximum rows available does not match with the maximum rows when it is selected.
